The report provides in depth analysis on global nuclear power market with forecasts up to 2030. The report analyzes the power market scenario in Japan (includes thermal conventional, nuclear, large hydro, pumped storage and renewables) and provides future outlook with forecasts up to 2030. The research details nuclear power market outlook in the country and provides forecasts up to 2030. The report highlights installed capacity and power generation trends from 2006 to 2030 in Japan nuclear power market. A detailed coverage of nuclear energy policy framework governing the market with specific policies pertaining to nuclear is provided in the report. The research also provides details of active nuclear reactors in the country, market size of major equipment and company snapshot of some of the major market participants.

Scope

- A brief introduction on global carbon emissions and global primary energy consumption.
- Historical period is during 2006-2016 (unless specified) and forecast period is for 2017-2030.
- Overview on the global nuclear power market with installed capacity and generation trends, installed capacity split by region in 2016, installed capacity split by major nuclear power countries in 2016 and investment trends.
- Power market scenario in Japan provides detailed market overview, installed capacity and power generation trends by various fuel types (includes thermal conventional, nuclear, large hydro and

renewables) with forecasts up to 2030.

- Details of Japan nuclear power market with installed capacity and generation trends, installed capacity by reactor type, installed capacity share by contractor/owner and information on major active and upcoming projects.
- Key policies and regulatory framework supporting nuclear power development.
- Company snapshots of some of the major market participants in the country.

Reasons to buy

- The report will enhance your decision making capability in a more rapid and time sensitive manner.
- Identify key growth and investment opportunities in Japan nuclear power market.
- Facilitate decision-making based on strong historic and forecast data for nuclear power market.
- Position yourself to gain the maximum advantage of the industry's growth potential.
- Identify key partners and business development avenues.
- Understand and respond to your competitors' business structure, strategy and prospects.
