

Amnbr Pte. Ltd. announces support from Asia Group (Indonesia) for Amnbr mesh network initiative

SINGAPORE, SINGAPORE, August 30, 2017 /EINPresswire.com/ -- "Amnbr holds tremendous promise to scale and be the first widely deployed [mesh network](#). The innovation and the team behind it certainly makes us excited. More people will be served in more places, which is what drives participation in all things Internet. This results in education, economic and social advances that ultimately improve our economy. Asia Group regards it as a strategically sound decision to be involved in this project. We strongly support the Amnbr mesh network initiative as it could help not only in urban areas, but in rural areas as-well. Amnbr should comply with all the Indonesian Government rules and regulations should it be implemented here," says Mr. Syamsul Munir, Asia Group's Chairman.

"Amnbr offers an entirely [new business model](#), allowing individuals to share their Internet access and earn tokens in the process. Other users gain [broadband access](#) easily where they could not before, and the market forces will drive down costs as more participate. Essentially the tokens are used to make micro-payments for access," says Rakesh Rajagopal, director of the Amnbr Foundation.

"We are very proud of the support by Asia Group. We are seeking funding for our initiative in public Token Offering on September 1, 2017," says Dr. Hamid who is the advisor to Amnbr in Indonesia.

About Asia Group:

Asia Group is a diversified group of companies from Indonesia, active in IT & Telecommunications, Energy & Mining, Electrical, Mechanical Engineering, and Consulting. For more information about Asia Group, please visit www.asiagroup-id.com.

About Amnbr:

The Amnbr Foundation is based in Singapore, with technology development partners in the United States, Ireland, Belgium, Switzerland and Hong Kong. For more information about Amnbr, please visit www.amnbr.com.

Note to editors: Amnbr is pronounced the same as "Amber". "Amnbr" refers to the Amnbr Foundation and Amnbr products and technology. "AMMBR" refers to the cryptographic tokens used.
