

LAZY LEE Rotating Closets Chooses Lockdowel for No-Screw Assembly and Smooth Design

Lazy Lee, inventor of rotating cabinets and closets, selects Lockdowel snap-together fastening for easy assembly and disassembly for all furniture designs

CEDAR CITY, UTAH, USA, August 31, 2017 /EINPresswire.com/ -- [Lazy Lee®](http://www.LazyLee.com) the creators of rotating closets and cabinets announces the company will be using [Lockdowel](http://www.Lockdowel.com) assembly exclusively on all of their furniture creations by 2018. Lockdowel allows fast assembly of the company's modular and rotating closets and cabinets without glue or screws, giving each piece a smooth continuous custom look.

"Lockdowel not only saves us money, but enhances the appearance of all of our furniture, while at the same time strengthening the connections, making our closets easier and faster to assemble and making our systems truly modular," Inventor and Designer Lee Goldsticker, AKA Lazy "Lee", says.

Recently Lee was asked to move a custom closet and because of the Lockdowel connections was able to take down the cabinetry and shelves without damaging the integrity of the wood or connections. "With the ability to assemble and disassemble easily, Lockdowel increases the value of our product-- and when all is said and done, is no more expensive than the CAM system of fastening that the closet industry has traditionally accepted," Lee explains. "Customers can move their closet system with them from one home to another if they wish."

Lee received inspiration for the Lazy Lee closets from living in Europe in dwellings without any closets or storage spaces available whatsoever. By utilizing corners he found a solution with greater capacity and more eye appeal than has ever been seen before.

"Lockdowel has even made drawer assembly and installation within our product line easy enough for the Do-it-Yourself customer to feel like a professional," Lee says. "We're excited to apply the Lockdowel solution to a wide array of systems serving a variety of industries—and even more to come!"
