

2pass Clinic Offers World Leading Facial Feminization & Body Feminization Services

2pass clinic announces its status as a world leader in facial and body feminization services.

ANTWERP, BELGIUM, September 1, 2017 /EINPresswire.com/ -- Transitioning comes with many emotions, including excitement, satisfaction, and some apprehension. 2pass Clinic, headquartered in Antwerp, Belgium, has a mission to make transition surgeries safe, effective, and comfortable. In fact, it's a world leader in facial feminization and body feminization services.

Facial Feminization Surgery

Facial feminization surgery is a series of procedures designed to soften masculine features and make the face look more rounded and feminine. While facial feminization surgery may include a variety of different procedures, its main goal is to change the shape of the face. Doctors will focus on reducing the jawline and forehead size, raising the cheekbones, making the lips fuller, and more. Patients who schedule consultations with 2pass Clinic will meet one-on-one with Dr. [Bart van de Ven](#), who will provide some insight and advice regarding the best procedures for their individual needs.

Body Feminization Surgery

Just as facial feminization surgery focuses on contouring and reshaping the face, body feminization surgery is about sculpting feminine curves. These procedures are also known as male-to-female (MTF) body contouring, and they change the shape of the body. They include buttock, breast, and hip augmentation as well as liposculpture. The team at 2pass Clinic can even use state-of-the-art 3D software to help patients visualize their breast implants. This can help patients choose the right breast size and shape. Patients who schedule consultations with 2pass Clinic will meet one-on-one with Dr. Maarten Doornaert, who will provide some insight and advice regarding the best procedures for their individual needs.

Why 2pass Clinic is Different

When most doctors and clinics perform feminization surgeries, their patients are required to leave the hospital after one or two days. At 2pass Clinic, this is not the case. On the top floor of the clinic they provide their patients with a guest cottage where the patient can stay for one week that facilitates medical treatments and recovery, making their patients feel more at-home, relaxed, and confident in their transitions.
