[Fixed Satellite Service Market Research Report 2017](#)

An FSS is a type of service that uses geosynchronous satellites to broadcast through TV and radio, telecommunications, and satellite communication that are used by governments, military organizations, small and large enterprises, and other end-users. It can provide information to intelligence and security organizations. FSS is classified into wholesale services and managed services. The satellites used for FSS have low-power output and require larger dish-style antennas than direct broadcasting satellites. FSS works with bands such as C-band, Ku-band, and Ka-band.
