

# Pulmonary Arterial Hypertension (PAH) Market 2017 – Insights, Epidemiology and Forecast by 2025

*WiseGuyReports.com adds “Pulmonary Arterial Hypertension (PAH) Market 2017 Global Analysis Research Report Forecasting to 2025” reports to its database.*

PUNE, INDIA, September 11, 2017  
/EINPresswire.com/ -- [Pulmonary Arterial Hypertension \(PAH\) Market:](#)

## Executive Summary

Prevalent cases of PAH in the 7MM (US, Germany, Spain, Italy, France, United Kingdom and Japan) are around 70,000 in 2016, out of which females are the ones to be majorly afflicted with this disease, accounting to 70% of the prevalent cases. Among the three major sub-types of PAH i.e., idiopathic PAH, heritable PAH and disease associated PAH, at least 30% prevalent population suffers from idiopathic PAH.

Classified under the WHO Class I, [Pulmonary Arterial Hypertension \(PAH\)](#) is a rare, chronic and progressive form of Pulmonary Hypertension. It occurs due to the tightening and stiffening of the small pulmonary arteries, leading to the right ventricular dysfunction and vessel obstruction, increased pressure on heart and progressive worsening of heart health.

latest report “Pulmonary Arterial Hypertension (PAH) – MarketInsights, Epidemiology and Market Forecast-2025” states that Pulmonary Arterial Hypertension will have a global market size of USD 9.9 billion by the year 2025, with its prevalence increasing at a CAGR of 1.37% (2015-2025), affecting a lot more people than what was expected in the previous studies.

## [pulmonary-arterial-hypertension-pah-market-insights-epidemiology-and-market-forecast-2025](https://www.wiseguyreports.com/enquiry/2101647-pulmonary-arterial-hypertension-pah-market-insights-epidemiology-and-market-forecast-2025)

Therapeutic market of PAH is dominated with the use of endothelin receptor antagonists, prostanoids, calcium channel blockers, phosphodiesterase inhibitors and soluble Guanylate Cyclase (sGC) stimulators. Most recommended endothelin receptor antagonists used for the treatment of PAH are Letairis/Volibris (GalaxoSmithKline/Gilead Science), Opsumit (Actelion Pharmaceuticals Ltd.) etc.

Recently companies have shifted their focus on the development of Prostacyclin\Prostanoids. Their current focus is reflected in the currently approved prostanoids like Orenitram (United Therapeutics Corp) in United States in 2013, Uptravi (Actelion Pharmaceuticals Ltd) in 2015 in United States and Europe in 2016. Uptravi is expected to be a blockbuster drug with high sales in upcoming years. Moreover, much anticipated drugs like Aurora-GT (first ever gene therapy for PAH; to be launched in the United States) and Tysberprost (United Therapeutic Corp.) are going to impact the market scenario of PAH as well.

The emerging new therapies are expected to show remarkable growth in the upcoming years and have the potential to become the standard of care for PAH patients. With all these advancements, the PAH market is expected to experience a steady growth after 2019 and is estimated to reach USD 9.9 billion by the year 2025. The report highlights drivers and barriers in the market of PAH which will help in identifying the opportunities to increase the possible market share of a pharmaceutical company by many folds.

### Key Coverage:

Understanding historical and forecasted epidemiological data for Pulmonary Arterial Hypertension (PAH) covering 7MM from 2015-2025.

Segment level epidemiology and market split for Pulmonary Arterial Hypertension (PAH) .

The thorough assessment of competitors, market, current trends & treatments along with upcoming treatments for Pulmonary Arterial Hypertension (PAH)

The Report also covers the market size for 7MM (United States, EU 5 (Germany, Spain, Italy, France and United Kingdom) and Japan) from 2015-2025 and detailed historical and forecasted Pulmonary Arterial Hypertension (PAH) market trends.

Thorough market distribution based on market share for Pulmonary Arterial Hypertension (PAH)

.

### Reasons to buy:

The report will help in developing business strategies by understanding trends shaping and driving the Pulmonary Arterial Hypertension market.

To understand the future market competition in the PAH market and Insight reviews of the key market drivers and barriers.

Organize sales and marketing efforts by identifying the best opportunities for PAH in US, Europe (Germany, Spain, Italy, France and United Kingdom) and Japan, ROE and ROW.

Identification of strong upcoming players in market will help in devising strategies that will help in getting ahead of competitors.
