

Nathan Parr Joins Cool Solutions Group

Cool Solutions Group expands its Church Facility Management services including assessments, evaluations and training.

CHARLOTTE, NORTH CAROLINA, UNITED STATES, September 11, 2017 /EINPresswire.com/ -- For the past several months, we have had a significant increase in inquiries from churches that need help with addressing issues related to their facilities. Some are in need of new space, but the majority have one of the following needs:

Better utilization of their space
Understanding the Life Cycle of their facility (and components) and their deferred maintenance.
Desire to improve their Facility Management (Facility Stewardship) means, methods, systems and knowledge.

“

I am excited to begin this new journey, excited to be a part of this new team, excited to partner with folks across the country in being intentional with their facilities.”

Nathan Parr

This is encouraging for us...not because it could generate more business for us...but because we believe that church leaders are coming to the realization that Facility Stewardship is a Biblical mandate and as such, we are seeing leaders take the care, management, utilization and INTENTIONALITY of the stewardship of the ministry facilities entrusted to them much more seriously.

To that end, we are expanding our [SUSTAIN](#) services to help lead, train and support church leaders in all of these areas. In fact, we believe so strongly in this that we have added a new

member to our team. I would like to introduce you to Nathan Parr as our newest full time team member.

Nathan is one of the brightest Church Facility Managers I have ever worked with...which is why he is a perfect fit for the Cool Solutions Group Team. He could truly be seen as a “Pastor of Facilities” for nearly any church in America...and now he can come alongside churches across the country to share his passion for ministry, excellence in processes and expertise in all things Church Facility Management.

Check out the whole story including the added services [HERE](#)
