WiseGuyReports.Com adds" Global Automotive eCall Market 2016-2020 "Research To Its Database.

eCall is an initiative by the transportation safety regulatory bodies to provide immediate assistance to people involved in accidents. It is a sub-system of telematics systems being installed in a vehicle. Implementation of eCall requires significant investment in infrastructure. In the case of a crash, it contacts the closest emergency center and forwards the GPS location of the crash site to the emergency center executives. eCall can be activated manually as well as automatically. It gets activated automatically if the vehicle meets with an accident and the airbag is deployed.
