Summary

Construction Intelligence Center (CIC) is currently tracking health construction projects globally with a total value of US\$406 billion. The Americas accounts for the highest share with US\$138.2 billion. Europe is in second place, with projects with a value of US\$116.5 billion. Asia-Pacific have projects valued at US\$96.5 billion and the Middle East and Africa a project pipeline trailing the other regions with US\$54.7 billion.

Scope

The report provides analysis based on CIC projects showing total project values for the Global market and analysis by stage and funding for the top ten countries. Top project listings for the sector are also shown.

Key points to buy

Providing insight into main drivers of activity and forecasts, providing an understanding of key trends, analysis of projects by value for the Global market and main countries enabling clients to target products and services for each type of project. Analysis of main projects by value for the sector enabling clients to target products and services for each type of project. Providing top projects data

with location, value, stage and start date.

Key Highlights

Regional variations in this ratio show that the Americas has the highest proportion of private funding with 57% and the MEA has the highest share of public funding with 67%.

This ratio is common with other types of construction projects in the regions where private investment is highly developed in the Americas.

The cash-rich countries of the Gulf region mean government-funded projects are dominant.

Table of Contents

1. Global Overview
2. Regional Overview – The Americas
3. Regional Overview – Europe
4. Regional Overview – Asia-Pacific
5. Regional Overview – Middle East and Africa
6. Project Analytics by Country
