A comprehensive analysis is available in the entire report, in which the number of users generating revenue, and counting is independent, not how large a user generates revenue. The Department provides analysis of the success, challenges and strategies of text writing, games, video and e-commerce revenue, users, market value, predictions, as well as detailed competitive market segments and major players in each plague and sub-division. However on social media content

platforms cover markets for platforms and sub-specialties.

Once the e-commerce platform is developed, SOA will become a major aspect of the messaging platform once and only once the delivery messaging, which will allow the retail component to change the communications industry. Social networks provide intuitive support for communication, people generally want to talk to people they know and buy things recommended by people they know.

Social media messaging is right one of the great and biggest platforms for sharing the information or new content, so many big organization and marketers are trying to reach maximum audiences or particular audiences with help of Social media messaging (SMM). They best part is that information can be video, audio or message with design with one single platform and thousands of users at one time which keep users busy and attach to that information they share this to their circles this help to spread and reach more and more audiences which are great benefits of organization or marketing business.

Facebook messaging applies texting via smartphone data plan. It is necessary to pay for each of these texts. Users do not have to pay for each message. Social media messaging has crossed the point of plain communication and has become a forum for games, commerce and payment, media, taxi services and beyond. Since these trends are spreading globally, mobile messaging leaders are developing in central communication centers.

Within the coming years there would be more active users on social media messaging platform all around the globe and due to new technology.
