

Reevert Storage, Backup and Recovery Solution Now Supports IBM Bluemix Cloud Storage Service

Reevert storage, backup and recovery solution is pleased to announce that their 1.11.5 firmware update adds support for IBM Bluemix Cloud Storage service.

GLENDALE, CA, USA, September 13, 2017 /EINPresswire.com/ -- [Reevert](#) storage, backup and recovery solution is pleased to announce that their 1.11.5 firmware update adds support for IBM Bluemix Cloud Storage service.

IBM Bluemix Cloud Storage service is an enterprise class public storage service which offers competitive pricing and service compatibility with Amazon AWS S3. Additionally, it offers startup agility and enterprise scalability.

With global data centers, IBM makes it incredibly simple for users and businesses to store their data on the Cloud. Backed by IBM SecureSlice technology with encryption for data at rest, it offers built-in security, multiple storage classes and easy management.

reevert was specifically designed to defend your backups with their ransomware resistant software. With the IBM Bluemix integration, reevert now provides clients with a growing list of competitively priced, secure and durable Cloud storage options in addition to its local ransomware-resistant backup capabilities.

To learn more about reevert storage, backup and recovery solution and to get your 30 day free trial, please visit www.reevert.com.

About IBM Bluemix: The IBM Bluemix cloud platform helps you solve real problems and drive business value with applications, infrastructure and services. It weaves together the services, infrastructure and data to rapidly bring your ideas to production. Bluemix is able to manage and scale your business from day 1 to year 105, and simplifies the process of building systems that use data to understand, reason, and learn.

About reevert: reevert is a comprehensive all-in-one backup and storage solution, designed from the ground up specifically to protect against ransomware and data loss. It features fast hourly snapshots, safeguards your data and backups, and allows very fast recovery from ransomware and malware infections, unlike other backup solutions. Reevert can image servers and computers, protect network shares and local files and offers offsite Cloud Data replication. More at: www.reevert.com.
