

Next-Generation Biologics 2017 Global Market Outlook, Research, Trends and Forecast to 2020

WiseGuyReports.Com Publish a New Market Research Report On - "Next-Generation Biologics 2017 Global Market Outlook,Research,Trends and Forecast to 2020".

PUNE, INDIA, September 14, 2017 /EINPresswire.com/ --

The analysts forecast the global next-generation biologics market to grow at a CAGR of 14.42% during the period 2016-2020.

According to the section 351 of the Public Health Service Act of the US FDA, a biological product is defined as a "virus, therapeutic serum, antitoxin, vaccine, toxin, blood, blood component or derivative, analogous product or allergenic product, applicable to the treatment, prevention, or cure of a condition or disease of human beings." Biologic therapeutics include virus, toxins, allergenic products, therapeutic serums, antitoxin, blood components or derivatives, vaccines, blood, proteins (except any chemically synthesized polypeptide), or analogous products, or arsphenamine or derivative of arsphenamine intended for the

treatment, prevention, or cure of a disease or condition. The differences between the small molecules and biologics includes the molecular weight, structure, procedure of synthesis, and immunogenicity. Biologics usually have a higher molecular weight and a complex molecular structure. They are usually derived from living organisms, which is another important feature that differentiates it from small molecules. Biologics are also vulnerable to extreme temperatures and light.

Covered in this report

The report covers the present scenario and the growth prospects of the global next-generation biologics market for 2016-2020. To calculate the market size, the report considers the revenue generated from the sales of next-generation biologics. The report also considers the revenues to be generated from the sales of drugs that are expected to be launched into the market during the forecast period.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

The report, Global Next-generation Biologics Market 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- F. Hofmann-La Roche
- Novo Nordisk
- Sanofi
- Takeda Pharmaceuticals

Other prominent vendors

- Aastrom Biosciences
- AbbVie
- AbGenomics
- Acologix
- ADC Therapeutics
- Adocia
- Agensys
- AlloCure
- AlloSource
- ALMAC Group

.

Market driver

- Advanced technological innovations
- For a full, detailed list, view our report

Market challenge

- Complexities in manufacturing of biologics
- For a full, detailed list, view our report

Market trend

- Development of gene and cell therapy-based products
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2020 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- · What are the market opportunities and threats faced by the key vendors?
- What are the strengths and weaknesses of the key vendors?

Ask Query @ https://www.wiseguyreports.com/enquiry/809479-global-next-generation-biologics-market-2016-2020

Table Of Contents - Major Key Points

PART 01: Executive summary

Highlights

PART 02: Scope of the report

- Market overview
- Top-vendor offerings

PART 03: Market research methodology

- Research methodology
- Economic indicators

PART 04: Introduction

Key market highlights

PART 05: Market landscape

- Market overview
- Five forces analysis

PART 06: Market segmentation by application

- Global regenerative medicine market
- Global next-generation antibodies market
- Global next-generation insulin products market
- Global next-generation recombinant coagulation factors market

PART 07: Geographical segmentation

- Next-generation biologics market in Americas
- Next-generation biologics market in EMEA
- Next-generation biologics market in APAC

PART 08: Market drivers

- Increase in demand for ADCs
- Advanced technological innovations
- Reimbursement support for next-generation biologics
- Special regulatory drug designations for biologics

PART 09: Impact of drivers

PART 10: Market challenges

- Complexities in manufacturing of biologics
- Complicated regulatory framework
- Difficulties in patient recruitment for conducting clinical trials, high cost, and failure rate in clinical trials
- Critical ethical challenges in clinical trial design

PART 11: Impact of drivers and challenges

PART 12: Market trends

- Focus on regenerative medicines
- Focus on oral insulin therapies
- Development of gene and cell therapy-based products
- Emergence of targeted and combination therapies

PART 13: Vendor landscape

- Competitive scenario
- Key news
- Other prominent vendors

PART 14: Key vendor analysis

- Biogen
- F. Hoffmann-La Roche
- Novo Nordisk
- Sanofi4
- Takeda Pharmaceuticals

PART 15: Appendix
