

# Bella IMC Helps Rebuild Using Lockdowel

*Bella Innovative Modern Cabinetry uses Lockdowel Snap-together Joining to Ship Flat-pack Cabinets to Hurricane Cities to Rebuild Better, Stronger, Faster...*

FORT WAYNE, IND., USA, September 19, 2017 /EINPresswire.com/ -- Three weeks post Harvey and nine days post Irma, now businesses are left with the aftermath of rebuilding. Many are seeing this as an opportunity to re-build smarter, and need "smarter" faster than ever.

"Each day without business is a day behind the profits the business owner was counting on for 2017," commercial cabinet maker Chad Shelton, owner and president of Bella IMC in Huntertown, Indiana says. "With snap-together Lockdowel assembly at the site, via on-line ordering and flat packed shipping, we can get contractors rebuilding offices and homes in seven to ten days."

Bella IMC ships flat packed cabinets to the site where contractors can assemble using Lockdowel glue-less, tool-less joining.

Bella IMC serves other cabinet manufacturers by producing, cabinet boxes, doors and drawers. Cabinet shops and contractors who may have lost their equipment or ability to be operational can lean on Bella IMC to fulfill [cabinetry](#) orders. "While owners sort through the steps needed to regain operation, we can seamlessly bridge the production gap. In addition, there will be a strong need for product as homeowners begin to [rebuild](#)," Shelton, the 2017 CMA Wood Diamond Lean Manufacturing Award Winner says.

Twelve months ago Chad Shelton didn't have a vision about two hurricanes devastating the nation's south, but he did recognize a more efficient way to build cabinetry with the Lockdowel joining system. Lockdowel has invented a screw-less, glue-less, AWI tested assembly system which allows very fast, intuitive assembly for cabinets and furniture.

"Using Lockdowel assembly for cabinets and closets and shelving contractors build at least 60 percent faster with 60 percent more profits," Co-founder and President Bryan Koelling says. "We save time and resources in finishing, assembly and manufacturing."

"By removing the clamping and gluing process with the Lockdowel, combined with our easy-to-use online ordering, we can rapidly produce cabinets with a huge reduction on labor costs," Shelton says. "Our prices to the contractors we serve, are extremely competitive while providing a quality constructed box that has great integrity. We can greatly expedite the rebuild timeline for builders,

contractors and cabinet shops!”

About Bella IMC:

Prior to launching Bella IMC, Chadwick Industries was a custom woodwork manufacturing shop for both commercial and residential cabinetry and millwork. Bella IMC specializes in custom designed and one-off work from architects and contractors. Chadwick Industries has completed projects for many midwest hospitals, University of Notre Dame, W-Hotel in Austin, Venetian Hotel Las Vegas as well as homes in the U.S. Virgin Islands. Chadwick Industries is a fully automated cabinetry facility with capabilities to complete several large projects simultaneously. Chadwick Industries - 2410 Main Street, Huntertown.
