

Construction in Morocco Market 2017- By Plan Future Business Decisions Using the Forecast Figures 2021

PUNE, MAHARASHTRA, INDIA,
September 20, 2017 /EINPresswire.com/
--

WiseGuyReports published new report,
titled "Construction in Morocco".

Synopsis

In real terms, the Moroccan construction industry posted positive growth during the review period (2012–2016) despite political instability. The industry was supported by effective political reforms implemented by the government, coupled with large-scale investments in various transport and residential infrastructure projects.

Over the forecast period (2017–2021), industry growth is expected to be supported by government efforts to upgrade the country's transport infrastructure and improve the country's energy production capacity.

The government's aim to encourage the participation of the private-sector in economic growth through public-private partnerships is expected to bode well for the industry over the forecast period. expects the construction output to register a compound annual growth rate (CAGR) of 3.74% in real terms from 2017 to 2021.

- Understand the latest industry and market trends.
- Formulate and validate strategy using critical and actionable insight.
- Assess business risks, including cost, regulatory and competitive pressures.
- Evaluate competitive risk and success factors.

Key Highlights

- In May 2016, the Chinese government signed a memorandum of understanding with the Moroccan government to develop a new industrial city with a total investment of MAD98.3 billion (US\$10.0 billion) in Tangiers.
- In a bid to promote economic growth, in November 2016 the government, announced plans to invest MAD77.0 billion (US\$7.8 billion) until 2021 to develop various public infrastructure projects in the Western Sahara region.
- Under the 2014–2018 Integrated Development Program for Bouregreg Valley, in June 2017 the government, signed an agreement to develop a skyscraper in Rabat with a total investment of MAD3.7 billion (US\$375.0 million). This includes the construction of a 45-storey tower with several hotels, offices, luxury apartments, the National Archives of the Kingdom of Morocco, and an arts and culture house.
- The development of transport infrastructure is vital to Morocco's economic growth. In January 2016, the African Development Bank granted a loan worth MAD1.1 billion (US\$112.3 million) until 2020 to develop rail infrastructure projects in the country.
- According to, the energy and utilities construction market is expected to record a CAGR of 6.38% over the forecast period, as compared with 4.90% registered during the period. Market growth is expected to be supported by the government's aim to reduce reliance on energy imports. Accordingly, in January 2017, the government announced plans to generate 4,000MW of energy from renewable sources by 2020, owing to the vast potential of the renewable sector. This is expected to drive funding towards renewable energy infrastructure projects over the forecast period.
