

M. Weston Non-Surgical Hair Restoration Opens in Georgia

ATLANTA, GEORGIA, USA, October 30, 2017 /EINPresswire.com/ -- M. Weston Non-Surgical Hair Restoration, an Artistry Concepts' subsidiary, the first and longest running [scalp micropigmentation](#) provider in the United States, announces the opening of their second location in Atlanta, Georgia.

Since the founding of its parent company, Artistry Concepts in 2009, non-surgical hair loss treatments have been provided to more than 4,000 clients and currently is located in Florida. The Georgia Weston Center marks the second US center to be able to provide proven non-surgical hair restoration services to a wider audience of men and women.

“As part of The Weston Center’s national expansion, our additional location in Georgia will serve the needs of more individuals suffering from hair loss,” says Weston Center Corporate Owner Mark Weston. “As the only worldwide scalp micropigmentation company to offer a proven and patented system, [The Weston System](#) has helped thousands of individuals overcome their hair loss issues via the latest advancement in technology and innovations.”

Georgia Weston Center owner, Justin Chamberland, 34, also a hair loss sufferer, went the route of so many sufferers; topicals, medications and even thoughts about extreme hair transplants. Not satisfied with any of the outcomes, Chamberland searched the internet and discovered scalp micropigmentation. Discovering Mark Weston and the world's only patent holder in the field of scalp micropigmentation, Chamberland flew to the Corporate Offices in Florida and met with Weston for this patented procedure.

“

The Georgia Center offers more convenience to a high number of clients. Additional east coast accessibility will allow clients a chance to experience this permanent solution for hair loss.”

Justin Chamberland, Georgia Weston Center Owner

So overwhelmed with the final outcome, Chamberland was excited to learn that Weston was teaching his System to a limited number of qualified apprentices. Chamberland later both became a protege and apprenticed under Weston to learn The Weston SystemSM, he then invested in his own location of the M. Weston Non-Surgical Hair Restoration Centers. Chamberland now owns and operates the Georgia Weston Center.

Justin Chamberland is the owner/operator of the Georgia Weston Center

The Georgia Weston Center, located in Suite #202, in the Northside Tower at 6065 Roswell Road, Atlanta, Georgia, is now open for business. For more information on the Georgia Weston Center, please visit:

Offering a one appointment only and permanent, non-surgical solution to hair loss for both men and women, The Weston SystemSM is an exclusive and patented technologically-advanced hybrid medical scalp micropigmentation method that mimics lost follicular hair units on the scalp. This System is successful in replicating lost follicles for men, women and also for camouflaging hair transplant scars and added density.

Locations in Cleveland, Ohio, Chicago, Illinois and Mexico City, Mexico will open in 2018.
