[Induction Cookware Market 2017](#)

Induction cooking is a process in which cookware that is specially designed for induction cooktops and induction hobs is used. This cookware that works on induction cooktops is called induction cookware. This cookware gets heated up with the help of magnetic induction, instead of using conduction from flames or other elements that can heat up electrically. Induction cookware has a ferromagnetic metal base and is made of cast iron and stainless steel. These materials are suitable for cooking on induction cooktops.

The analysts forecast the global induction cookware market to grow at a CAGR of 6.19% during the period 2017-2021.
