Global [Automotive 3D Printing Market](#)

Description

WiseGuyReports.Com adds” Global Automotive 3D Printing Market 2017-2021 “Research To Its Database.

3D printing is a process which involves many concepts and technologies. It can be used to produce a range of products using different materials depending on the application. This technology is similar to computer numerical control (CNC). The only difference is that CNC is a subtractive manufacturing process while 3D printing is an additive manufacturing process. The advancement in this technology is mostly application-based, where special research is carried out as per the needs of the target industry. Experts believe that 3D printing technology is in its initial stages of application with immense potential to revolutionize production technology.

Covered in this report

The report covers the present scenario and the growth prospects of the global automotive 3D printing market for 2017-2021. To calculate the market size, the report considers the new shipments and sales data from the technology developers.

Get sample Report @ <https://www.wiseguyreports.com/sample-request/2331626-global-automotive-3d-printing-market-2017-2021>

The market is divided into the following segments based on geography:

- Americas

- APAC
- EMEA

The Global Automotive 3D Printing Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- 3D Systems
- Stratasys

Other prominent vendors

- Arcam
- Autodesk
- EnvisionTEC
- EOS
- ExOne
- Optomec
- Ultimaker

Market driver

- Introduction of low-cost entry level 3D printers
- For a full, detailed list, view our report

Market challenge

- Price for a 3D printing machine does not justify its productivity
- For a full, detailed list, view our report

Market trend

- Simultaneous multi-material technology
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?

Table of Contents -Major Key Points

PART 01: Executive summary

PART 02: Scope of the report

PART 03: Research Methodology

PART 04: Introduction

- Market outline

PART 05: Market landscape

- Market overview
- Market size and forecast

PART 06: Market segmentation by 3D printing solution

- Market overview
- Market size and forecast
- Global automotive 3D printing market by products
- Global automotive 3D printing market by materials
- Global automotive 3D printing market by services

PART 07: Market segmentation contract type

- Market overview
- Market size and forecast
- Global automotive 3D printing market by outsourced
- Global automotive 3D printing market by in-house

PART 08: Geographic segmentation

- Market overview
- Automotive 3D printing market in Americas
- Automotive 3D printing market in EMEA
- Automotive 3D printing market in APAC

PART 09: Decision framework

PART 10: Drivers and challenges

- Market drivers
- Market challenges

PART 11: Market trends

- Simultaneous multi-material technology
- 3D printing lithography laser system technology
- Localizing production of spare parts
- Carbon3D CLIP technology

PART 12: Vendor landscape

- Overview
- Other prominent vendors

PART 13: Key vendor analysis

- 3D printing market: Current standing
- 3D Systems
- Stratasys
