Wiseguyreports.Com Adds “Nanomaterials -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2022” To Its Research Database

The Global Nanomaterials Market accounted for \$4.79 billion in 2015 and is expected to reach \$19.83 billion by 2022 growing at a CAGR of 22.5% from 2015 to 2022. The nanomaterials market is favoured by the governmental funding to support the prospective growth. The increasing applications of nanotechnology across various verticals and advent of novel methods for nanostructures fabrication are offering lucrative opportunities for vendors in the market. Partnerships & strategic alliances by existing players, growing number of players operating in the market and newer material developments are further fueling the market. However, rising environmental concerns and toxicity of nanomaterials have a negative impact on the market.

North America commanded the market followed by Europe, due to increased usage of nanomaterials in healthcare and electronics industries in the region. Significant growth of nanomaterials was observed in the Asia pacific during last couple of years owing to favourable government initiatives, continued environmental awareness and rise in demand for specialty materials. Biofuels, drug delivery and Field lamination display (FED) are likely to be the potential applications of nanomaterials in near future. Players with innovation capacity are expected to command the market in future.

Some of the key players in the market are Showa Denko, Nanocyl SA, Kuraray, Hyperion, Catalysis International Inc., Hollingsworth & Vose, Finetex, Elmarco, DuPont, CNano Technology Ltd., Bayer AG, Arkema and Ahlstrom.
