Global [Contract Life-Cycle Management Market](#)

Description

WiseGuyReports.Com adds" Global Contract Life-Cycle Management Market 2015-2019 "Research To Its Database.

Traditionally, contracts were documented on paper and presented for any revisions or amendments till the final version was prepared. Lawyers used to review the contracts manually, which was a time consuming and error prone process. With evolution in technology, companies started managing contracts via the electronic media. However, the electronic format of contracts have not enhanced the visibility of the contracts, resulting in poor management of those contracts. With the adoption of CLM software, companies enhanced the visibility of the contracts and, hence, were able to provide timely information to make informed decisions.

CLM software allows companies to streamline the contracting process by automating the drafting of contracts. It also helps negotiate, track, manage, and obtain optimal value from buy-side as well as sell-side contracts. Demand for CLM software comes from sectors involving complex contracts, such as the financial services, healthcare, manufacturing, and public sectors. Large enterprises as well as small enterprises in these sectors are adopting CLM software to manage their contracts.

Covered in this report

The global CLM market is segmented on the basis of products and geography.
