

The role of microbiome therapies and the regulatory issues surrounding the development of this field

SMi Group is pleased to announce the international speaker line up of the 7th annual Pharmaceutical Microbiology Conference and Exhibition.

LONDON, UNITED KINGDOM,
September 26, 2017 /EINPresswire.com/
-- This year's theme is 'Delivering information on rapid microbial methods, sterility assurance and [mycoplasma](#) testing' which includes topical keynote addresses, interactive presentations and tailored workshops.

The 2018 event welcomes all microbiologist, scientists, research scholars, industrial professionals and technologist from microbiology and healthcare sectors to be a part of the esteemed [Pharmaceutical Microbiology](#) 2018. Next year's event will be the best incorporation of academia and research involving every aspect of microbiology and biotechnology and will showcase all types of research methodologies both from academia and industry.

Pharmaceutical Microbiology will demonstrate the role of [microbiome](#) therapies and the regulatory issues surrounding the development of this field, the most effective methods to assure sterility within clean rooms, as well as approaches to overcome low endotoxin recovery (LER) using the LAL assay and alternative to rabbit pyrogen testing. The meeting is set to be attended by industry renowned speakers and delegates.

The event will also feature two post-conference workshops, Addressing Objectionable Organisms – What, Why, Who, How? and Rapid Microbial Methods (Led by Sanofi and Battelle Memorial Institute).

Join the room full of industry experts to discuss: microbial contamination in aseptic manufacturing environments; risk assessments in fungal spore and bacterial spore excursions; optimising rapid microbial detection methods; tackling the current challenge of biofilms and much more.
