[Electric Oral Care Market 2017](#)

Electric oral care products are electric tools that are used to ensure the hygiene of the teeth, the gums, and the tongue. These products function on the electric input provided. They move at faster revolutions when compared with manual products. Oral hygiene products are used to prevent dental problems such as tooth decay, gum disease, bad breath, and the building of plaque and germs. Oral hygiene products are designed to clean teeth, remove plaque, floss, clean the tongue, and massage the gums. There are several oral hygiene products that are available in the market. These include toothbrushes, toothpaste, mouthwashes, flosses, powders, and demineralization agents such as whitening strips and sprays and trays. Toothbrushes consist of a head of tightly clustered bristles that are mounted on a handle. They clean areas of the mouth that are hard to reach.

The analysts forecast the global electric oral care market to grow at a CAGR of 8.28% during the period 2017-2021.
