## About Surface Disinfectant

Surface disinfectants are the chemical substances that kill or fight against pathogens such as viruses, bacteria, and fungi, present in non-living objects. Chemical substances that hinder the growth of micro-organisms that breed in the body of living organisms are known as antiseptics. Disinfectants are applied to non-living objects or surfaces such as floors, walls, and countertops. Disinfectants are antimicrobial agents that are indifferent to antibiotics and antiseptics, as they do not kill micro-organisms breeding in the body of living organisms.

Technavio's analysts forecast the global surface disinfectant market to grow at a CAGR of 11.70% during the period 2017-2021.
