Description

Wiseguyreports.Com Adds “Hyperscale Data Center -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2022” To Its Research Database

Global Hyperscale Data Center market is expected to grow from \$20.24 billion in 2016 to reach \$102.19 billion by 2023 with a CAGR of 26.0%. Hyperscale data center solution is designed to offer a single massively scalable compute architecture which is developed from individual servers called nodes that offer storage, software components and networking. The key drivers impacting the demand for the market growth include open compute project, rise in demand for declining Capex and Opex, energy efficiency, quick developments in IoT devices, condensed cost of ownership and increased number of applications across various industries. However, power failure and storage issues for hyperscale data centers are the major factors restricting the market.

By component, maintenance & support segment is anticipated to hold a major share in the hyperscale data center market due to the rising demand from organizations to sustain decisive IT infrastructure. By geography, North America is expected to witness significant growth over the forecast period attributed to existence of a huge number of data centers across various industry verticals.

Some of the key players in global Hyperscale Data Center market include Avago Technologies, Broadcom Ltd., Cavium, Inc. , Cisco Systems, Inc., Dell Inc., Ericsson, Hewlett Packard Enterprise Development Lp, Huawei Technologies Co., Ltd., Intel Corporation, International Business Machines Corporation, Lenovo Group Limited, Mellanox Technologies, Inc., Nlyte Software, Nvidia Corporation, Quanta Computer Inc. and Sandisk Corporation.
