

Construction in South Africa Market 2017 – By Analyzing the Performance of Various Competitors 2021

PUNE, MAHARASHTRA, INDIA, October 2, 2017 /EINPresswire.com/ --

Synopsis

WiseGuyReports published new report, titled "Construction in South Africa, Key Trends and Opportunities".

In real terms, the South African construction industry's forecast-period (2017–2021) outlook is moderate compared to its review-period (2012–2016) performance. This is a

result of economic slowdown, poor investor sentiment, high unemployment and a weak currency, which will weigh on construction spending.

The industry's output value in real terms is expected to rise at a compound annual growth rate (CAGR) of 1.57% over the forecast period, down from 2.67% during the review period.

Over the forecast period, industry growth is expected to be supported by investment in transport and logistics infrastructure, and energy construction projects, as well as the expansion of low-cost residential buildings.

Government efforts to balance supply and demand for social housing will drive demand for the construction of new residential units. Urbanization will continue to generate demand for residential and infrastructure development.

Key points to buy

- Identify and evaluate market opportunities using Timetric's standardized valuation and forecasting methodologies.
- Assess market growth potential at a micro-level with over 600 time-series data forecasts.
- Understand the latest industry and market trends.
- Formulate and validate strategy using Timetric's critical and actionable insight.
- Assess business risks, including cost, regulatory and competitive pressures.
- Evaluate competitive risk and success factors.

Key Highlights

- According to Stats SA, the total value of recorded building plans passed in the country grew by 6.0% in nominal terms, increasing from ZAR101.4 billion (US\$7.9 billion) in 2015 to ZAR107.5 billion (US\$7.3 billion) in 2016. Moreover, the total value of buildings reported as complete grew by 8.3% in nominal terms from ZAR56.7 billion (US\$4.4 billion) in 2015 to ZAR61.4 billion (US\$4.2 billion) in 2016.
- In line with the national development plan and medium-term strategic framework, in its 2017 budget, the government announced plans to invest ZAR947.2 (US\$62.2 billion) on public-sector

infrastructure over the Medium-Term Expenditure Framework (MTEF) period.

- To meet the demand from the country's lower- and middle-income groups, the government is developing various affordable housing projects in South Africa; accordingly, the DHS is undertaking the Human Settlements Housing Program in the country. The program involves the construction of 1.6 million affordable housing units by 2019.
- The government is investing in road infrastructure projects to improve the country's transport network,. Accordingly, the government announced plans in its 2017 budget to spend ZAR135.5 billion (US\$8.9 billion) on road infrastructure over the next three years.
- The South African construction industry's growth will be driven by government plans to increase the share of renewable energy in terms of total installed electricity capacity, and encourage investment in renewable energy infrastructure. Under the updated Integrated Resource Plan (IRP), the government aims to increase the share of renewable energy in total installed electricity capacity from 16.2% in 2016 to 22.3% in 2020 and 46.3% by 2030.
