

IT Governance will give a live demonstration of Vigilant Software's Data Flow Mapping Tool in GDPR webinar

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, October 2, 2017 /EINPresswire.com/ -- IT Governance, the leading provider of EU General Data Protection Regulation (GDPR) training, is pleased to give a live demonstration of its [data flow mapping tool](#) in the upcoming webinar 'Conducting a data flow mapping exercise under the GDPR'.

The GDPR embraces a risk-based approach to data protection and mandates data protection impact assessments where high-risk processing activities are concerned. To achieve an effective risk assessment, organisations will be required to map their data and consider a privacy by design approach to data security and protection.

'Conducting a data flow mapping exercise under the GDPR' is designed to provide an overview of the benefits, challenges, techniques and best practice for conducting a data mapping exercise in compliance with the GDPR. The webinar will also give a live demonstration of Vigilant Software's Data Flow Mapping Tool.

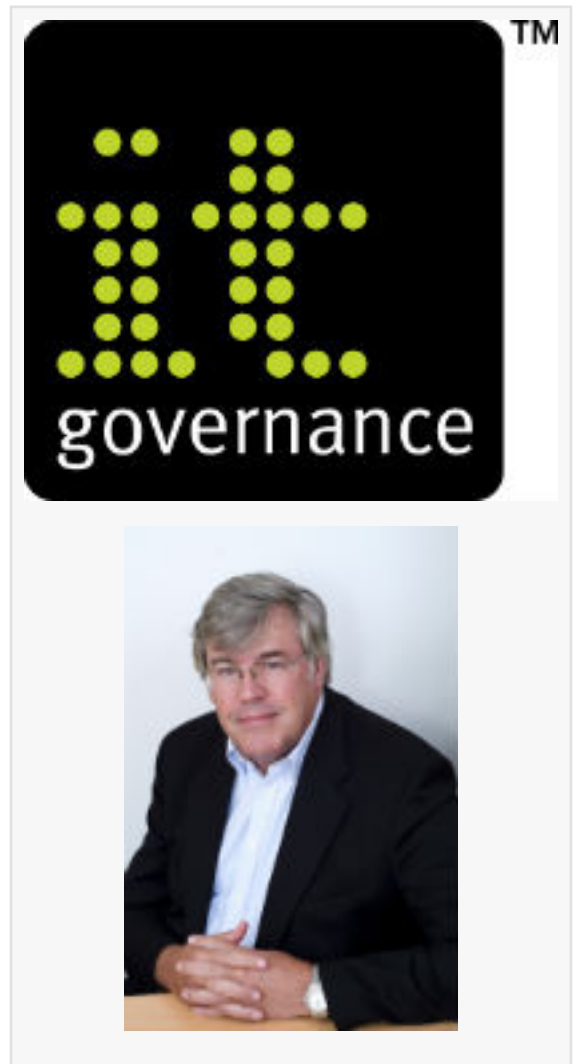

This webinar will cover the benefits and challenges of data flow mapping and provide attendees with techniques for mapping data flow, using the Data Flow Mapping Tool demonstration as best practice to achieving a fully integrated risk management analysis in line with the GDPR requirements.

The Cloud-based Data Flow Mapping Tool has been designed to simplify the process of creating data flow maps, giving a thorough understanding of what personal data is being processed within an organisation, where the data is stored, who is accountable, who has access and with whom the data is shared.

Webinar: Conducting a data flow mapping exercise under the GDPR

Presenter: Alan Calder, founder and executive chairman of IT Governance

Date: Wednesday, 4 October 2017

Time: 3:00 pm BST
