## US [Data Center Fabric Market](#)

### Description

WiseGuyReports.Com adds” Data Center Fabric Market in the US 2015-2019 “Research To Its Database.

Data center fabric is a simple network infrastructure in which interconnections between switches are weaved in the form of fabrics. These interconnections are used to create multiple active links. Data center fabric is used to meet networking demand, such as in the use of bandwidth and topology extension, and to improve failover time in the data center for cloud and virtualization environments. Data center fabric reduces the IT budget of an organization to meet present and future computing requirements of enterprises. Data center fabric is popular among cloud-based organizations because it improves the flexibility, agility, and efficiency of their IT-related operations.
