Executive Summary

Global online gambling market increased at a significant CAGR during the span of 5 years i.e. 2010-2014 and projections are made that the market would rise in the next five years i.e. 2015-2020 tremendously. Global sports betting and online gaming markets are the segment of global online gambling market which exhibited an increase, driving the global online gambling market. The upsurge in the market was due to various benefits of online gambling over traditional gambling (land based gambling), increase in internet connectivity of people, rise in the ownership of gadgets such as mobile, tablets, desktops, laptops etc. and various amendments in the regulations regarding the online gambling market in various countries.

The major growth drivers for the online gambling market are: increase in mobile penetration rate causing the rise in mobile gambling market, technological developments which help in expansion of online gambling and increase in customer demographics. Despite the market is governed by various growth drivers, there are certain challenges faced by the market, of which two major challenges are lack of suitable software handling and cyber security issues.
