

EKG Online Program Receives National Accreditation through the N.C.C.T.

Phlebotomy Career Training is pleased to announce that the National Center for Competency Testing has approved their Electrocardiogram online course.

GARDEN CITY, MICHIGAN, UNITED STATES, October 4, 2017 /EINPresswire.com/ -- Phlebotomy Career Training is proud to announce their accreditation of their [Electrocardiogram](#) Technician online program through the National Center for Competency Testing. The N.C.C.T. is a certifying accredited organization serving prestigious technical schools throughout the United States since the late 1980's. As part of Phlebotomy Career Training's course offerings, the [ECG](#), [EKG](#) and Telemetry Technician has been recognized by the N.C.C.T., the National Telemetry Association and the A.M.C.A. as meeting or exceeding national standards of post secondary education.

Phlebotomy Career Training is a faculty-centered, peer review process that is designed to certify the quality of online and blended courses. PCT is a leader in quality assurance for online education and has received national recognition for its peer-based approach and continuous improvement in online education and student learning. There are many factors that affect course quality, such as improved student learning outcomes and retention in online courses.

National recognition for PCT Electrocardiogram/Telemetry courses meet the N.C.C.T. standards. Access to the PCT Learning community for collaboration allows for reviews and course design online along with faculty and student performance.

Online education has now become the mainstream way of earning degrees and certifications as well as training. Professor Kimmel states, "We are very proud to offer our students superior education at affordable prices. Our unique blend of video training along with reading, Power Point Presentations and unlimited quiz retakes, allows the student to immerse themselves in the course."

Professor Kimmel indicates that each student also receives personalized instruction from local health care professionals in their field of specialization, such as electrocardiogram instruction or telemetry.

The online program in ECG, EKG and Telemetry, through phlebotomy career training offers students the combination of learning environments. There is a level of confidence in the program which every student needs to know that they are going to be well received when seeking employment.

National certification is one of the requirements in today's job market. While the medical profession

Students at Phlebotomy Career Training can learn how to read, interpret and place ECG's via online classes taught by MSN-FNP's in MI

will continue to grow with respect to jobs, the quality of the employees' education will be the most crucial pivotal factor in determining employment.
