## [Smart Classroom Market in India 2017](#)

The adoption of smart classrooms in India is driven by the need to improve the standard of education in the country and enable it to be on par with the global standards. Smart classrooms require investment for the purchase of hardware and software products. End-users include schools, colleges, universities, and other institutions that offer professional and vocational courses. Smart classrooms use live videos and pictures to make classes more interactive. In this setting, students have accessibility to learning materials even after regular class hours. Students can also access online libraries at their convenience. Competitive exams in India are also being conducted through online platforms. Smart classrooms are transforming the education system and turning it into an IT-enabled education system. However, resistance to change along with certain infrastructure challenges are hindering the growth of this market.

The analysts forecast the Smart Classroom market in India to grow at a CAGR of 15.89 percent over the period 2014-2019.
