Key Highlights

- The oil and gas market volume is defined as the total consumption (barrels of oil equivalent) of refined petroleum products and natural gas by end-users in each country.
- The value of the oil segment reflects the total volume of refined petroleum products, including refinery consumption and losses, multiplied by the hub price of crude oil.
- The value of the gas segment is calculated as the total volume of dry natural gas consumed multiplied by the price of natural gas (Henry Hub spot price). The values represent the total revenues available to exploration and production companies from sales of crude oil and natural gas.
- Any currency conversions used in this report have been calculated using constant 2016 annual average exchange rates.
- The global oil & gas market had total revenues of \$1,205.6bn in 2016, representing a compound annual rate of change (CARC) of -19.9% between 2012 and 2016.
- Market consumption volume increased with a compound annual growth rate (CAGR) of 1.3% between 2012 and 2016, to reach a total of 48.7 billion BOE in 2016.
- Demand for oil and gas is witnessing deceleration and this is partially intentional as the Chinese government seeks to move the country's economy away from its focus on manufacturing and instead divert it towards the less energy intensive services sector. More energy efficient technology is also resulting in less volume consumption in this market. Nevertheless the strong growth in other markets around the world should ensure that globally the demand for oil and gas accelerates overall.

Scope

- Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the global oil & gas market
- Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the global oil & gas market
- Leading company profiles reveal details of key oil & gas market players' global operations and financial performance
- Add weight to presentations and pitches by understanding the future growth prospects of the global oil & gas market with five year forecasts by both value and volume

Reasons to buy

- What was the size of the global oil & gas market by value in 2016?
- What will be the size of the global oil & gas market in 2021?
- What factors are affecting the strength of competition in the global oil & gas market?
- How has the market performed over the last five years?
- What are the main segments that make up the global oil & gas market?
