

# Gas-to-Liquids processes for chemicals and energy Market 2017 Global Analysis and Industry Forecast 2018-2022

---

*Global Gas-to-Liquids processes for chemicals and energy market is expected to reach \$9.2 billion growing at a CAGR of 6.7% to reach \$15.5 billion by 2022.*

PUNE, MAHARASHTRA, INDIA, October 12, 2017 /EINPresswire.com/ -- [Gas-to-Liquids Processes for Chemicals and Energy Market](#)

## Description

The Global Gas-to-Liquids processes for chemicals and energy market is expected to reach \$9.2 billion growing at a CAGR of 6.7% to reach \$15.5 billion by 2022. Gas to liquids (GTL) is a refinery process that converts natural gas into liquid fuels such as gasoline. Methane-rich gases are renewed into liquid synthetic fuels either via direct conversion via syngas as an intermediary. Rapid energy consumption and price of oil and gases are the foremost drivers for gas to liquid market, whereas the fixed reactors and large sized equipment are inhibiting the growth. The increasing consumption of natural gas, especially in emerging countries such as India, Japan and China act as the opportunity for gas to liquids market.

The most common technique used at GTL facilities is Fischer-Tropsch (F-T) synthesis. F-T synthesis has gained recent attention because of the rising extend between the cost of natural gas and the cost of petroleum products. Lubricating products and production of waxes are another primary product of the F-T process and developers have reworked on their designs, to increase the enduring profitability of GTL plants. The increasing demand for waxes that are produced by F-T process is experiencing stable growth over the past decade. F-T waxes are used in industries producing paints & coatings, candles, plastic, resins, tires, synthetic rubber and other products.

Request for Sample Report @ <https://www.wiseguyreports.com/sample-request/222044-gas-to-liquids-processes-for-chemicals-and-energy-global-market-outlook-trends-forecast-and-opportunity-assessment-2014-2022>

Global gas-to-liquids processes for chemicals and energy market is mainly segregated by production, by size, by products and by geography. Based on production, the market is segmented into Methanol to Gasoline (MTG) process, gasoline plus process, fischer-tropsch

process. Based on Size, the market is categorized into small scale and large scale. Based on products, the market is segmented into diesel, ethane, LPG, base oil and paraffin. Market by geography, is segmented into North America, Europe, Asia Pacific, and Rest of the World. Due to the rise in natural gas consumption, Asia Pacific is expected to be the leading market for Gas to liquids (GTL).

The key players in the market include

PetroSA Company, Royal Dutch Shell, Primus Green Energy, EmberClear, Sasol limited, BP plc, Compact GTL, Chevron Corporation, and Linc Energy.

What our report offers:

- Market share assessments for the regional and country level segments
- Market share analysis of the top industry players
- Strategic recommendations for the new entrants
- Market forecasts for a minimum of 8 years of all the mentioned segments, sub segments and the regional markets
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

## Table Of Content

### 1 Executive Summary

### 2 Preface

#### 2.1 Abstract

#### 2.2 Research Scope

#### 2.3 Research Methodology

#### 2.4 Research Sources

### 3 Market Trend Analysis

#### 3.1 Introduction

3.2 Drivers

3.3 Restraints

3.4 Opportunities

3.5 Threats

4 Porters Five Force Analysis

4.1 Bargaining power of suppliers

4.2 Bargaining power of buyers

4.3 Threat of substitutes

4.4 Threat of new entrants

4.5 Competitive rivalry

5 Global Gas-to-Liquids Processes for Chemicals and Energy Market, By Production

5.1 Introduction

5.2 Methanol to Gasoline (MTG) process

5.3 Gasoline plus process

5.4 Fischer-Tropsch process

6 Global Gas-to-Liquids Processes for Chemicals and Energy Market, By Size

6.1 Introduction

6.2 small scale

6.3 Large scale

7 Global Gas-to-Liquids Processes for Chemicals and Energy Market, By Products

7.1 Introduction

7.2 Diesel

7.3 Ethane

7.4 LPG

7.5 Paraffin

7.6 Base oil

7.7 Naphtha

8 Global Gas-to-Liquids Processes for Chemicals and Energy Market, By Geography

8.1 North America

8.1.1 US

8.1.2 Canada

8.2 Europe

8.2.1 Germany

8.2.2 France

8.2.3 Italy

8.2.4 UK

8.2.5 Spain

8.3 Asia Pacific

- 8.3.1 Japan
- 8.3.2 China
- 8.3.3 India
- 8.3.4 Australia
- 8.3.5 New Zealand
- 8.3.6 Rest of Asia
- 8.4 Rest of the World
- 8.4.1 Latin America
- 8.4.2 Middle East
- 8.4.3 Africa
- 8.4.4 Others
