Beyond Security Announces 3rd Hack2Win Competition at Code Blue Japan

$50,000 USD in prizes will be awarded

CUPETINO, CALIFORNIA, UNITED STATES, October 16, 2017 /EINPresswire.com/ -- Cupertino, CA October 16, 2017 – Beyond Security, a leading provider for automated security testing solutions including vulnerability management announced the 3rd Hack2Win Code Blue competition, with prize awarded up to $50.000 USD. The competition will be taking place in Tokyo, Japan from November 7 through 10th.

"This year we have changed the format, raised the difficulty level and increased the prizes," said Noam Rathaus, CTO and CO-Founder of Beyond Security. "A device would be considered 'hacked' if the participant can prove that they gained access to the device's post-authentication admin web interface, changed some configuration value such as the Wi-Fi password or made the device do something it's not supposed to do - like execute code, or open a port/service which was previously closed" he added.

This year's competition will have three categories, there will be six total targets, two for each category. There are prizes for each category, different payouts, and different winning requirements. Each category has different prizes and highest prize will be given to the first eligible submission. Additionally, a Quadcopter will be given to one participant awarded "The Best of the Show." To learn more about this competition and eligibility requirement, please visit, https://codeblue.jp/2017/en/contents/contests.html

The Code Blue is organized by the BLUE Inc and this year it will take place in Tokyo, Japan from November 7-10. The conference covers areas like information security and cyber security, and security specialists from all over the world participates to exchange information and interact.
