## [Aluminum Wire Rods Market 2017](#)

Aluminum is purchased typically in a coil by wire mills, to be employed in the manufacture of rods. The manufacturing process of a rod involves the assigning of unique heat or a lot number. This lot or heat pertaining to aluminum is then processed to arrive at the final rod state. The aluminum rod that has undergone processing is then cold-drawn to arrive at the final desired aluminum wire diameter. Aluminum wire rods typically have a diameter in the range of 9.6 mm-32 mm.

The analysts forecast the global aluminum wire rods market to grow at a CAGR of 1.86% during the period 2017-2021.
