[Release Agents Market 2017](#)

The release agent is a substance which is applied to a surface, distinctively to the container surfaces, to restrain the bonding between the surfaces, thereby minimizing the material loss and preventing production delays. It is used in various applications, including both food and non-food industrial segments. The report is confined to applications in food and industrial segments which include bakery and confectionery, processed food, meat, and others such as dairy, sauce, convenience food, and functional food. Release agents help in the easy removal of foodstuffs from pans, baking sheets, bowls, molds or tins used in the food industry.

The analysts forecast the global release agents market to grow at a CAGR of 4.31% during the period 2017-2021.
