

Global Cell Culture Instruments And Consumables Market To Reach USD 21,058 Million By 2022

WEMBLEY, MIDDLESEX, UNITED KINGDOM, October 18, 2017 /EINPresswire.com/ -- Meticulous Research™ – one of the leading global market research companies published a research report titled "[Cell Culture Instruments and Consumables Market – Global Opportunity Analysis and Industry Forecasts To 2022](#)".

According to this latest publication from Meticulous Research™, the global [cell culture market](#) will grow at a CAGR of 10.7% from 2017 to 2022 to reach USD 21,058 million by 2022, driven by increase in the life science research, advancement in cell based technology, increasing prevalence of various chronic

diseases, rising demand for cell based therapies, and increasing cell based production. However, high cost of cell culture research and high risk of contamination have embraced the growth of cell culture market globally. Further, handling and optimization of protocol for in vitro studies poses a great challenge for the growth of this market.

The global cell culture market is mainly segmented by product, (consumables and instruments), by application, (vaccination, toxicity testing, cancer research, drug screening and development, recombinant products, stem cell technology, regenerative medicine, and others), and by end user (pharmaceutical & biotechnology industries, academic institutes, and research centers)- Global Opportunity Analysis and Industry Forecasts To 2022. The cell culture consumables commanded major share in the global market with the media contributing the largest share of this market. The use of cell culture consumables is rapidly increasing due to the advancement of high content analysis techniques and increased large biomolecular therapies. The adoption of cell culture consumables is further expected to grow for research or clinical purpose to meet high standard performance, consistency, and safety.

North America holds the major share in the global cell culture market, followed by Europe and Asia-Pacific. The large share of this region is primarily attributed to increased funding in medical research, drug development regulations which demand cell culture products, growing aging population and thereby prevalence of various chronic diseases, and direct & indirect financial investments in the pharma biotech industries. However, Asia-Pacific region possesses lucrative growth potential for the

cell culture market during the forecast period. This is mainly attributed to high population zone, various technological advancements, increasing investments in the healthcare and pharmaceutical sector, increasing investment from government & non-government bodies, and growing pharmaceutical industry in the region.

The leading companies have employed various strategies to expand their product and application offerings, global footprint, and augment their market share. The key strategies followed by most companies in the global cell culture market were collaborations & partnerships, new product developments, acquisitions, and expansions. The key players operating in the global cell culture market are Irvine Scientific, HiMedia Laboratories, Cell Culture Company (CCC) LLC, Merck & Co., Incorporation, GE Healthcare, Agilent Technologies, Thermo Fisher Scientific, PromoCell GmbH, Lonza (Switzerland), Corning Incorporation, Becton Dickinson (BD), CellGenix GmbH (Germany), InvivoGen, Sera Care Life Sciences Incorporation, and American Type Culture Collection (ATCC).

Key questions answered in the report-

Which are the high growth market segments in terms of products, applications, end users, and regions/countries?

What is the historical market for cell culture across the globe?

What are the market forecasts and estimates from the period 2015-2022?

What are the major drivers, restraints, challenges, and trends in the global Cell culture market?

Who are the major players in the global cell culture market and what share of the market do they hold?

Who are the major players in various countries and what share of the market do they hold?

What are the competitive landscapes and who are the market leaders by sub-region in the global cell culture market?

What are the recent developments in the global cell culture market?

What are the different strategies adopted by the major players in the global cell culture market?

What are the geographical trends and high growth regions/ countries?

What are the local emerging players in the global cell culture market and how do they compete with the global players?

About Meticulous Research™

Meticulous Research™ is founded in 2010 and incorporated as Meticulous Market Research Pvt. Ltd. in 2013 as a private limited company under the Companies Act, 1956. Since its incorporation, the company has become the leading provider of premium market intelligence in North America, Europe, Asia-Pacific, Latin America, and Middle East & Africa.

With the meticulous primary and secondary research techniques, we have built strong capabilities in data collection, interpretation, and analysis of data including qualitative and quantitative research with the finest team of analysts. We design our meticulously analyzed intelligent and value-driven syndicated market research reports, custom studies, quick turnaround research, and consulting solutions to address business challenges of sustainable growth. Meticulous Research™ produces global reports and custom studies for North America, Europe, Latin America, Asia-Pacific, and the Middle East and Africa regions. These reports are used by our clients for marketing and strategic planning in various sectors.
