

Global Graphite Market Driven By Increasing Demand for Batteries & Rapid Growth In Mining Industry

PUNE, MAHARASHTRA, INDIA, October 18, 2017 /EINPresswire.com/ --

SUMMARY

Pune, India, 11 September 2017: WiseGuyReports announced addition of new report, titled "Global Graphite Market with Focus on Lithium-ion Batteries & Recarburisers: Industry Analysis & Outlook (2017-2021)".

Global Graphite Market

The report provides in depth analysis on the report Global Graphite Market.

The major highlights in the report are market size, share, trend, development coming years and recent years. The values analysis for past and the current year is also provided. Market segmentation on basis of the region, revenues, sales, the application is also covered report has provided detail profile of key players in the market what are their strategies, market share, profit, production capacity and key trend.

Financial analysis of key players is also explained. Detail analysis of lithium-ion batteries and recarburized market by demand, volume, price, share. The market dynamics which are driving the graphite market on basis of the Automotive and electronic sector, mining industry. The report provides the market forecast for the period of 2017 to 2021.

Graphite is a soft, crystalline, of basic carbon. Graphite is a gray on black, opaque minerals with a metallic shine. It is naturally found in marble rocks such as marble, shifts, genes, and pellets. It is commonly found as a nerve, lens and a pocket and as a thin laminarite distributed in metallic rocks. Graphite is classified into three forms, based on occurrences and originals: flake, crystalline, and cryptocrystalline (amorphous). Graphite is used in steel production, auto part fabrication, lubricants, and batteries.

Future demand drivers have the possibility of green technology such as lithium-ion batteries, fuel cells, construction materials, and grapheme-based industrial products. Graphite-end battery consuming batteries, expandable graphite, composites, refractories and foamy, steel markets, gaskets, seals, brake linings, and snacks.

Important factors for growth of graphite market include rapid growth in the mining industry, decrease in automobile and electronic progress, increase in battery demand and lithium-ion battery spending. The lithium-ion battery has some significant trends and developmental improvements in lithium-ion batteries, demand for lithium-ion battery increases with high investment, penetration of Tesla in the lithium-Ion market, increased synthetic graphite production, flake and vein exploration and increasing electric vehicles demand and other electronic equipment. However, due to security problems, market expansion is hampered. The report covers few large players in report are Northern Graphite Corporation, Alabama Graphite Corporation, Mason Graphite Inc. and Focus Graphite Inc.
