[Plastic Packaging Market 2017](#)

Plastic packaging is used in the packaging of F&B, pharmaceuticals, chemicals, and other consumer products. Plastic bottles and containers are non-corrosive, light, and relatively cheap; plastic can be molded into a variety of shapes and dimensions, making it highly suitable for packaging. Its inert nature and ability to preserve products for a longer period of time makes it a popular choice in the F&B industry. In the F&B sector, plastic packaging helps in the promotion of products as they are more appealing to customers.

The analysts forecast the Global Plastic Packaging market will grow at a CAGR of 4.79 percent over the period 2014-2019.
