About Iron Casting

Iron casting is one of the oldest ferrous metals that consists of carbon, silicon, and small amounts of sulfur, manganese, and phosphorous. The different types of iron castings include gray cast iron, ductile cast iron, and malleable cast iron. Iron castings have high carbon content and are hard, brittle, more fusible, and non-malleable. They are used extensively in different applications, such as automotive, industrial machinery, infrastructure and construction machines, and power and energy.

Technavio's analysts forecast the iron casting market in North America to grow at a CAGR of 4.07% during the period 2017-2021.

PART 04: Introduction

- Market outline

PART 05: Market landscape

- Market overview

- Market size and forecast

- Five forces analysis

PART 06: Market segmentation by product type

- Iron casting market in North America by product type

- Gray iron casting market in North America

- Ductile iron casting market in North America

- Malleable iron casting market in North America

PART 07: Market segmentation by application

- Iron casting market in North America by application

- Iron casting market in North America for the automotive segment

- Iron casting market in North America for the industrial machinery segment

- Iron casting market in North America for the infrastructure and construction machines segment

- Iron casting market in North America for the power and energy segment

- Iron casting market in North America for the others segment

PART 08: Geographical segmentation

- Iron casting market in North America by geography

- Iron casting market in the US

- Iron casting market in Mexico

- Iron casting market in Canada

PART 09: Decision framework

PART 10: Drivers and challenges

- Market drivers

- Market challenges

PART 11: Market trends

- Modernization in the foundry industry

- Increased use of iron casting in the renewable energy sector

- Rise in technological advancements

- Industry consolidation
