

# The Leading IPX Networks of 2017

---

*Mobile Operators rate 29 vendors, ROCCO shares the results*

LONDON, GREATER LONDON, UK, October 24, 2017 /EINPresswire.com/ -- ROCCO HQ London 23/10/17 Our research has been concluded, the results have been checked and verified and we are pleased to announce the Tier One Providers in [IPX](#) Networks for 2017.

IPX Networks are one of the most important Vendors for any networks offering LTE and VoLTE. LTE [Data Roaming](#), [Diameter](#) Signalling and Voice over IPX can be considered the basic services that we find in the IPX Providers service portfolio, but IPX Providers need to continually differentiate themselves by implementing core network elements to support current and next generation services: inter alia IMS-based VoLTE, ViLTE, RCS, VoWiFi and services that help to improve the subscriber Quality of Experience (QoE) with intelligent policy services.

Congratulations to all five Tier One providers who performed so well across the performance and leadership categories! Tier One means that across all categories these providers reached 4-5 points out of 5.

## IPX Networks Vendor Performance Report 2017

Between August and October 2017 we asked MNOs globally to give us their perceptions of IPX Network Vendors, how well they knew them and how they would rate them. They rated Vendors on 40+ KPIs in the area of Performance, Value and Leadership. The survey was about brand perception, experience of these providers as well as an understanding of whether Operators would choose them over others. There were 29 Vendors which invited tough competition.

Operators who participated in the Research will receive their free Executive Summary Report today, thanks for your support and feedback, we hope you enjoy the data and insights into the Vendors.

Congratulation to all the Vendors whom were recognised in the report!

## OTHER REPORTS WE HAVE CONDUCTED ON IPX

### IPX Networks BIG Data Market Intelligence Report 2016

IPX Providers were interviewed in an RFP style approach in our Market Intelligence Report about IPX BIG Data Offerings: 9 Vendors were interviewed: BICS, Comfone, Deutsche Telekom ICSS, iBasis, Syniverse, Tata Communications, Telecom Italia Sparkle, Telia Carrier, and Transaction Network Services.

The project aims to provide an overview of the IPX Providers's businesses and revenues, the services they currently provide with over IPX, their vision about the future of the IPX services. This reports is also focused on the solutions that such IPX Providers are offering for Big Data analytics, to support the MNO's roaming business.
