

# CIM-Tech to Present at Woodworking Machinery and Supply Expo (WMS) 2017 in Toronto, Canada

*AUTODESK and AUTOCAD Expert Kenny Belfatto of CIM-Tech.com to Present at WMS 2017 – Revealing the Link from Design to Shop Floor Production*

ORLANDO, FL, UNITED STATES, October 24, 2017 /EINPresswire.com/ -- AUTODESK® Certified expert [Kenny Belfatto](#) of [CIM-Tech.com](#), will present at the 2017 Woodworking Machinery and Supply Expo ([WMS](#)) in Toronto, Canada November 2, 2017. As a panel member of the Cabinet Design Conference Session, Belfatto will be demonstrating how to bridge the link between “Design and Driving Shop Floor Production.”

“We’re excited to show shop owners how to take the headache out of custom-design manufacturing,” Belfatto, an AUTOCAD® expert says. “Whether the shop is manufacturing thousands or just one amazing piece, we can save hours and hours of design transferring time.”

Earlier this year CIM-Tech.com announced the 2018 version of their flagship software, Router-CIM. Router-CIM 2018 transfers creations from AUTOCAD®, AUTODESK Inventor®, Solid Edge® or SOLIDWORKS® to any CNC manufacturing machine, and is full of new and newly improved features that make manufacturing the most intricate creations fast, seamless and efficient.

Belfatto has spearheaded CIM-Tech’s sales team since the company’s inception in 1986. He is looking forward to WMS Toronto and reconnecting with his many Canadian customers including Pleasure-way RV (Saskatoon), Belanger Laminates (Boucherville, QC), and Living Art Kitchens (Toronto).

“WMS is my favorite expo because the attendees, presenters and exhibitors really have time to exchange challenges, solutions, and best practices in a more casual friendly-paced atmosphere,” Belfatto says. “It is really both, a ‘think tank’ and a show.”

About CIM-Tech.com Inc.

Established in 1986, the founders of CIM-TECH realized that a CNC machine was only as good as your ability to program it. Computer Integrated Manufacturing (CIM) was needed to bridge the gap between Computer Aided Design (CAD) and Computer Aided Manufacturing (CAM). CIM provides for a seamless solution with a common interface for design and manufacturing. From this basic concept a new company was created, CIM-TECH. 7512 Dr. Phillips Blvd., Suite 50-859, Orlando, FL 32819; 407-219-9346 - [info@cim-tech.com](mailto:info@cim-tech.com); [www.cim-tech.com](http://www.cim-tech.com)
