Despite a strong economy and high level of financial inclusion, the cash for most of their day-to-day spend for German customers Payment cards are essentially used at the time of sale (POS), and the German POS network has been developed in Europe.

The priority of cash for German customers is not tied to the convenience of its use - the German prefers to control individual spending, certainty, and personal expenditure on cash. German customers' preference for privacy provides them with online payment tools to help pay their money without disclosing their account information, which means PayPal and Sofa chart are both popular. In 2015, less than 10% of the German customers had placed a cross-credit credit card, and 80% of them were funded entirely by the balance in each month.

Key finding in the report are,

Know what's happening with the behavior of customers and plan your strategy accordingly.

Find out what products are launched by major competitors in the market.

Find consumer sentiment for various payment tools in the German market and use this design to

provide product design information.

The major players cover in report are Visa, MasterCard, Girocard, Deutsche Bank, Sofort, Cookies, PayPal, Apple, Android, SIA, Jiffy and Deutsche Telekom
