About Casino Gaming

A casino hosts various types of gambling activities. Today, they house hotels, restaurants, shopping malls, and various other tourist attractions, and can be described as indoor amusement zones. However, the majority of revenue generated is from gambling activities. Gambling is illegal in many parts of the world, which explains the concentration of casinos in certain regions. However, several countries are easing regulations to support the growth of casinos within their territories because of their growing popularity and the revenue they generate.

Technavio's analysts forecast the revenue of the casino gaming market in Macau to decline at a CAGR of (3.47)% over the period 2014-2019.

Covered in this Report

This report covers the present scenario and growth prospects of the casino gaming market in Macau for the period 2015-2019. To calculate the market size, the report takes into account the revenue generated in casinos. The report only takes into account the revenue generated through land-based casinos and not online casinos, as online casinos are unregulated and have not been legalized in Macau. In addition, the report discusses the major drivers that influence the growth of the market. It also outlines the challenges faced by the vendors and the market at large, as well as the key trends that are emerging in the market.
