

Global Data Center Blade Server Market is Expected to to reach US\$18.584 billion by 2022

Market Research Report on the Global Data Center Blade Server Market

RAIPUR, INDIA, October 26, 2017 /EINPresswire.com/ --

Report Sellers has added a new market research report "<u>Data Center Blade</u>
<u>Server Market</u>- Forecasts from 2017 to

2022" to its offerings. The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

According to the report, the Data center blade server market is projected to grow at a CAGR of 7.90% over the forecast period to reach US\$18.584 billion by 2022, from US\$12.708 billion in 2017. Increasing adoption of virtualization solutions is impacting the growth of blade servers market. Advantages like manageability, flexibility, and scalability over rack servers, blade servers are witnessing higher adoption.

Moreover, smaller carbon footprint and low power consumption are additional factors contributing to the market growth and increased deployment by enterprises across the world. Increasing investments in ICT infrastructure, particularly in emerging economies like China and India, is expected to augment the demand for data center blade servers over the next five years.

Competitive Insights: The <u>global market for data center blade server</u> is fragmented with several large players dominating the market. However, the high-speed innovation and entry of smaller players are enhancing the competitive rivalry. Although the growth in cloud computing market provides numerous opportunities to the players, the ones with prior knowledge and experience are expected to take maximum advantage of the opportunities present in the market. Some of the major players discussed in the report include Super Micro Computer, Cisco, HP, Dell, IBM, Lenovo, Oracle, Intel, and Hitachi.
