[Synthetic Paper Market in Americas 2017](#)

Synthetic paper is manufactured using synthetic resins derived from petroleum, which is the main raw material for the production. The paper has the characteristics of both plastic films as well as regular paper and is available in different grades and thicknesses based on the application. The features of the paper are like plastic films, but the appearance of synthetic paper is similar to that of regular paper. Synthetic paper is white and opaque like regular paper and has a resemblance in terms of the printability and processing capabilities.

The analysts forecast the synthetic paper market in Americas to grow at a CAGR of 6.65% during the period 2017-2021.
