Asia Medical Tourism Market Research Report

RAIPUR, CHHATTISGARH, INDIA,

October 27, 2017 /EINPresswire.com/ -- Report Sellers has added a new market research report "[Asia Medical Tourism Market and Forecast To 2022](#)" to its offerings. The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

Asia continues to be the top medical destination in medical travel. Asian medical destinations continue to offer more and better medical procedures and care than most other medical destinations. Several hospitals in Asia have carved such outstanding reputations for themselves that medical tourism has become a major money-spinner. In countries such as Singapore and Thailand, government agencies have been set up to help market their expertise globally. The Indian government has removed many visa restrictions and introduced a visa-on-arrival scheme for medical tourists from selected countries; this allows foreign nationals to stay in India for 30 days for medical reasons and can even get a visa of up to 1 year depending upon treatment requirements. Special medical travel agencies have sprung up around the world, and top Asian hospitals routinely have special international desks and services to assist overseas patients with everything from doctors appointments to accommodation.

Thailand accounts for the maximum share of the Asia medical tourism market, being followed by India and Singapore. South Korea stands at the fourth spot in the year 2016 and is likely to almost double its market share by the year 2022, while Malaysia is holding the last spot with XX% market share in the year 2016.
