

VMUG Announces Tech Superstar Lineup for Upcoming Silicon Valley UserCon

The event will include a keynote presentation by Scott Lowe, Engineering Architect at VMware and sessions on exciting VMware integrations like AWS.

SAN JOSE, CA, USA, October 27, 2017 /EINPresswire.com/ -- The VMware User Group (VMUG) is excited to announce the lineup for the Silicon Valley UserCon

next week. The event will include a keynote presentation by Scott Lowe, Engineering Architect at VMware and sessions on exciting VMware announcements and integrations like Amazon Web Services.

In the opening keynote, Scott Lowe will discuss the change in the technology industry and how to cope with it. In his role as an engineering architect on the cloud services team at VMware, Inc., Lowe focuses on cloud computing and open source. Lowe has authored a number of books on vSphere and OpenStack, and he has been sharing technical content regularly on his blog for over 12 years.

A hot topic since the announcement at VMworld, VMware Cloud on AWS will bring their enterprise-class Software-Defined Data Center (SDDC) software to the AWS cloud. Customers will be able to run any application across vSphere-based private, public and hybrid cloud environments. It will be delivered, sold and supported by VMware as an on-demand, elastically scalable service and customers will be able to leverage the global footprint and breadth of services from AWS. This keynote will discuss what VMware Cloud on AWS is, how it differs from every other offering, integrations between VMs and AWS services, and more.

There will also be a session that covers what's new in vSphere 6.5. vSphere 6.5 is the latest and greatest version of their industry-leading virtualization platform. This session will feature a panel of customers who have already upgraded their environments to vSphere 6.5 to share their experiences and answer any questions you may have.

In addition to these speakers, attendees will have the opportunity to interact with vendors, sponsors, and partners in the Exhibit Hall and participate in a variety of other technical sessions from VMware and community experts!

Registration for VMUG UserCon events are open to all members of the tech industry and are free. Visit <https://www.vmug.com/Attend/VMUG-UserCon/Silicon-Valley-VMUG-UserCon-2017> to view the most up-to-date agenda and register for these must-attend events for VMware users.

About VMware User Group (VMUG)

VMware User Group (VMUG) is an independent, customer-led organization made up of more than 100,000 members globally, created to maximize members' use of VMware and partner solutions through knowledge, sharing, training, collaboration, and events. VMUG is the largest user group in the

virtualization and cloud infrastructure solutions industry. Interested in joining VMUG? Visit vmug.com and sign up, membership is always free and you can start enjoying the benefits of the VMUG community immediately.
