Textile Dyes Market Research Report

Report Sellers has added a new market research report "[Textile Dyes Market-](#)

Forecasts from 2017 to 2022" to its offerings. The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

According to the report, the textile dyes market is projected to grow at a CAGR of 7.25% over the projected period to reach US\$7.982 billion by 2022, from US\$5.625 billion in 2017. Textile dyes are used in the process of adding colors to textile products like fibers, yarns, and fabrics.

Preference of natural dyes, growing demand for colored textiles and fibers and strong research and development investments in plant based dyes are some of the key factors driving the market growth, whereas stringent environment laws, production overcapacity and raw materials price volatility are restraining the market growth. Growing demand for environment-friendly products is boosting the use of natural dyes in textile applications, which is further contributing to the demand of textile dyes.

Competitive Insights: The [global market for textile dyes](#) is highly fragmented with several players and the high market growth is expected to the entry of more players while enhancing the competitive rivalry within the industry.

The major players discussed in the report include Allied Industrial Corp. Ltd., Organic Dyestuffs Corporation, Archroma Management, Huntsman Corporation, Sumitomo Chemical, Yorkshire Group, Kiri Industries Limited, Clariant, Lanxess, and Kronos Worldwide. Industry integration and partnership are some of the key strategies being adopted by players to enhance their market share.
