

KALLISTA® Expands The Per Se® Series With New Console, Baths And Decorative Knobs By Saint-Louis

KALLISTA, a leading designer and supplier of luxury kitchen and bath plumbing products, features four new designs to the successful Per Se collection.

KOHLER, WIS., UNITED STATES, October 30, 2017 /EINPresswire.com/ -- [KALLISTA](#), a leading designer and supplier of luxury kitchen and bath plumbing products, features four new designs this year to the successful [Per Se](#) collection. Included in the mix is a new console table, two baths and crystal faucet knobs by the gifted artisans at Saint-Louis.

Paying homage to 1950s and 1960s design that moved away from the complex fluting or layered details of earlier periods, the Per Se collection made its debut in 2014 with modern, sleek forms that employed minimalist detail and chic couture-inspired styling. This attractive alternative of fashionable understatement continues with the introduction of these new designs and truly completes this important KALLISTA collection.

Per Se Console

This modern console table features a midnight black Nero Marquina honed marble top with rich pure white veining creating smart juxtaposition with the metal and crystal appointments that complement the design. The top is raised by metal legs in a staggered and tapered leg with a stretcher detail designed to meet a supporting wall, creating an integrated towel bar. The leg design is part of a new KALLISTA custom leg program allowing for customers to purchase the legs separately to accommodate any custom size console. The program is currently available to Script, Per Se and For Town by Michael S Smith collections.

Per Se Bathtubs

Two freestanding bathtubs complete the latest Per Se designs, both currently available standard in KALLISTA Stucco White. Mirroring many of the collection's design elements and materials, the Per Se bathtubs are offered in a Soft Square and Oval versions. An oversized rim design above a cocooning curved tub rests on a stepped plinth base. Both are a commanding 62"x34" size and 25-inch depth with slotted overflow to achieve a deeper water level and relaxing soak. The toe touch tub drain and cover allows for effortless water release. An integrated drain and overflow ensure the design aesthetics are not compromised. The cast stone design is 35 percent more durable than comparable materials with a smooth, easy-to-clean surface that resists stains. The very nature of the cast stone composition keeps warm water at temperature much longer than standard materials and provides a thick gloss finish.

Clear Crystal Sink Faucet Knobs by Saint-Louis

A collaboration with Cristallerie Royale de Saint-Louis (Saint-Louis) of France creates a luxurious

option to the Per Se decorative handle selection. The one-of-a-kind Per Se Clear Crystal Sink Faucet Knobs are handcrafted by Saint-Louis artisans, an appointment not easily achieved as each must apprentice for 10 years at a minimum before joining its illustrious team of master glass blowers and cutters. Renowned for its crystal works since the early 19th century, Saint-Louis continues to create rarified designs using the same Old World techniques of hand blowing and hand etching that have been passed down from generation to generation. The hand-cut and polished stacked crystal knobs reflect a pure beauty with a sparkling jewel-like appearance that complements the metal base offered in Polished Chrome, Nickel Silver, Black Nickel and Polished Gold KALLISTA living finishes.

About Saint-Louis

A CONTEMPORARY MANUFACTURE Unrivalled, dense, clear, sonorous and luminous, born of a ball of fire and the breath of man, Saint-Louis crystal vibrates with the immense talent inherited from history and the extraordinary creative fantasy inspired by current trends. Every day, Saint-Louis signs crystal creations – tableware, vases, chandeliers and candelabras – crafted by master glassblowers and cutters considered to be among the very best in France (Meilleurs Ouvriers de France). All possess irreplaceable knowledge and ancestral skills that have been enriched from generation to generation: crystal is mouth-blown, hand-made, hand-engraved and hand-decorated using 24-carat gold or platinum.

Established in 1586, the Munzthal glassworks were designated the Royal Glassworks by letters patent from King Louis XV in 1767, and became known as Saint-Louis. In 1781, experts at Saint-Louis discovered the secret formula of crystal, a great first for continental Europe.

Over the centuries, the Manufacture has forged emblems from its creations for the world's most illustrious courts. It is thanks to its hereditary ability to adapt and constantly innovate that Saint-Louis has skillfully sidestepped any risk of being engulfed by fashion or trends. For existing within one's time also means escaping the ephemeral.

In 1995, Saint-Louis became part of the Hermès Group, the renown of this prestigious house has enhanced by a new creative impetus.

About KALLISTA
