[DRaaS Market in the US 2017](#)

DRaaS refers to services that enable data backup, recovery, and retrieval to help in resuming business functions in the event of a disaster or service disruption. It is one of the fastest growing segments in the cloud-based recovery model. It helps enterprises record mission-critical data during the occurrence of natural calamities such as floods, tornados, and hurricanes, or a sudden and unforeseen system failure. As data are an integral part of business operations, securing them requires efficient and effective implementation of disaster recovery services. It also ensures the availability of IT infrastructure in the event of a disaster. DRaaS market in the US has gained a lot of traction after the occurrence of several natural disasters, including Hurricane Sandy that inflicted heavy losses on the Eastern Coast of the US.

The analysts forecast the DRaaS Market in the US to grow at a CAGR of 53.35 percent over the period 2014-2019.
