

TurbineAero Enters into Three Year A320 APU MRO Agreement with JetStar Pacific Vietnam

CHANDLER, ARIZONA, UNITED STATES, November 3, 2017

/EINPresswire.com/ -- TurbineAero has entered into a three-year GTCP131-9A (A320 Family) Auxiliary Power Unit (APU) Maintenance Repair Overhaul (MRO) agreement with JetStar Pacific Vietnam. The MRO contract is highlighted by TurbineAero's focus on guaranteed cost protections, minimum on-wing performance levels, and on-site engineering support.

This partnership provides Jetstar Pacific Vietnam with significant savings through TurbineAero's [SMaRT-Workscoping](#) maintenance approach. SMaRT-Workscoping enables TurbineAero's to offer reduced overall costs through a more analytical and modular based maintenance approach. With TurbineAero located at the center of Southeast Asia and near Bangkok's International Airport, TurbineAero's APU MRO capabilities are ready to meet the contract commitments.

"Jetstar Pacific Vietnam has enjoyed a close relationship with TurbineAero over the years, and we are delighted to expand on that relationship with this new GTCP131-9A Auxiliary Power Unit (APU) maintenance, repair and overhaul agreement. We find in TurbineAero a trusted partner that provides both qualitative, timely and cost-effective solutions to its customers as well as second-to-none service. The cooperation with TurbineAero would bring further support for Jetstar Pacific's fleet development as well as contribute to providing our passengers with quality service." said Mr. Nguyen Quoc Phuong, CEO of Jetstar Pacific Vietnam.

The customer gained confidence in TurbineAero in terms of pricing, quality, Turn Around Time (TAT) and service through the experience of having had trial APU's overhauled by TurbineAero-Asia in their Thailand based APU overhaul facility. "TurbineAero offers Free of Charge (FOC) trend monitoring services and detailed reliability improvement initiatives to Jetstar Pacific," said Peter Gille, Vice President/General Manager of TurbineAero's Asia business. "Same-day on-site support to Jetstar Pacific Vietnam, is completely achievable with TurbineAero as a partner"

About TurbineAero, Inc.

TurbineAero was created to become the most comprehensive, flexible, and customer-focused APU MRO Services company in the world. As the largest independent APU MRO globally, TurbineAero repairs, sells, leases, tests, and certifies APU and related parts accessories. TurbineAero currently has four locations, three business units are located near Phoenix, AZ and the fourth is just outside of Bangkok, Thailand.
